

JavaScript Practice Questions (Map, Filter, Hoisting)

1. What is the difference between `map()` and `forEach()` in JavaScript?
2. Write a program using `map()` to double each element of an array.
3. How does `filter()` work? Write a program to filter even numbers from an array.
4. What will be the output? `const arr = [1,2,3]; const result = arr.map(x => x * 2); console.log(result);`
5. What will be the output? `const arr = [1,2,3,4]; const result = arr.filter(x => x > 2); console.log(result);`
6. What is hoisting in JavaScript? Explain with an example.
7. What will be the output? `console.log(a); var a = 10;`
8. What will be the output? `sayHello(); function sayHello(){ console.log('Hello'); }`
9. What will be the output? `console.log(b); let b = 20;`
10. Explain the difference between `var`, `let`, and `const` in terms of hoisting.
