PROFESSIONAL OVERVIEW

Passionate Full Stack Developer (MERN Stack) with hands-on experience in building scalable web applications using React.js, Node.js, Express.js, and MongoDB. Skilled in frontend and backend development, API integration, database management, and responsive UI design. Gained practical industry-level development experience at Tips-G Alwar through real-world projects and collaborative development.

EDUCATION

Bachelor of Computer Applications (BCA) | 2024 - 27

Manipal University Jaipur, Raj.

PROJECT EXPERIENCE

Frontend Projects

- Developed responsive frontend clones of platforms like Facebook and Rapido using modern UI/UX practices and AI-assisted development tools.
- Built the complete frontend of the live-hosted Greenbeli Nursery website under mentor guidance with responsive design and optimized user experience.
- Created and deployed the live-hosted Moshika Water Purifier website with modern responsive UI and clean frontend architecture.
- Developed a Team Collaboration frontend project, gaining practical experience in GitHub collaboration, version control, and team-based development workflows.
- Designed and developed a personal portfolio website with responsive frontend design and REST API integration.

Full-Stack Projects

- Built multiple full-stack applications from scratch including a Movie Streaming Platform, Food Delivery Website, E-Commerce OS, and a Job Portal inspired by LinkedIn using MERN Stack technologies.
- Developed an enhanced clone of the official IRCTC platform with additional features, responsive UI, and improved user experience.
- Collaborated in a team under mentor guidance to develop a MERN-based Task Management System for Tips-G Alwar with Admin Panel, Student & Teacher Portals, Authentication, REST APIs, and MongoDB integration.
